|--|-----------------------|---|-----------------|------------|------------|----------|------------|------------|------------|-----|
| 4K                                     | Jump into 4K          | Students will be introduced to the 4K schedule, have a chance to interact with peers, and get a chance to explore the 4K classroom. Each week has a fun theme complete with art projects, books, outside time, and learning tasks.  | Mueller         |            | X          | X        |            | X          |            |     |
| 5K-2                                   | Life at the Zoo       | Dig into your wild animal side as you explore the world of animals. We will be doing arts, crafts, and learning about zoo animals! We will also be enjoying a trip to the New Zoo! By signing up for this class, you will be giving permission to the teacher to take your child off campus to participate in programs being offered during the class.                | Tetzlaff        | X          |            |          |            |            |            | \$8 |
| 5K-2                                   | Exploring Space       | Come learn about space and create some fun crafts and snacks! We will learn all about the moon, solar system, spaceships, rockets, the galaxy, and astronauts!  | Lisowe          | X          |            |          |            |            |            |     |
| 5K-5                                   | Calling All Engineers | Do you like building things and putting your mind to work? This is the class for you. You will design and build simple or complex models, a balloon challenge, egg drop challenge, basketball tower, different kinds of bridges using popsicle sticks, and so much more. Hands-on is the only way, so prepare to build from directions and from your own imagination! | Lisowe          |            | X          |          |            |            |            |     |
| 5K-2                                   | Indoor/ Outdoor Games | Have a blast playing both indoor and outdoor games. We'll play board games, group games, card games, bingo, outdoor games, and even some fun math games. Be ready to make your very own board game also!  | Tetzlaff        |            | X          | X        |            |            |            |     |

| Grade Level (s) Students Enter in Fall | Course Name            | Course Description   | Primary Teacher | June 15-18 | June 22-25 | July 6-9 | July 13-16 | July 20-23 | July 27-29 | Fee |

| 5K-3                                   | Cooking in the Kitchen | Hands on cooking and snack making fun in the kitchen! We'll test out a variety of recipes and create a recipe book to take home! They're all bound to be delicious! We will practice safe cooking habits throughout the kitchen. This class is designed for students to make food with and without a stove and microwave.  | Lisowe          |            |            | X        |            |            |            | \$5 |
| 5K-2                                   | Fun in the Kitchen     | We will use food to help us learn more about math, art, reading, and more! We will manipulate all types of food to make tasty treats including cookies, making our own ice-cream, making homemade bread, as well as using some foods to make crafts. By signing up for this class, you give your student permission to use kitchen tools and some appliances while being supervised. | Tetzlaff        |            |            |          | X          |            |            | \$7 |
| 5K-5                                   | Pirates Cove           | AAARRRRRRRRRR you ready to have a good time at Pirates Cove? Come aboard our pirate ship and get caught up in this real life adventure by finding treasures, sailing through the seas, talking like a pirate, and creating some pirate approved snacks! So come on Matey and join the fun!   | Lisowe          |            |            |          | X          |            |            |     |
| 5K-3                                   | Bugs and Butterflies   | Come on an adventure to learn about our little neighbors living next to us in nature! We will learn about different bugs and butterflies that are native Gillett and ones live farther away. Come explore with us and have a buggy good time!  | Lisowe          |            |            |          |            | X          |            |     |
| 5K-2                                   | Fun with Dr. Seuss     | Come join in the fun with Dr. Seuss. Each day we will have different books and activities...including making Oobleck!  | Matelski        |            |            |          |            | X          |            |     |

| 5K-3                                   | Crazy Kidz Pinterest Crafts       | Get creative with hands-on activities, crafts, and games found on Pinterest. The world of Pinterest has many crafts so be ready to use your creative mind to get crafty!  | Knuteson                |            |            |          |            |            | X          | \$5  |
| 5K-8                                   | Exploring the Outdoors(& Indoors) | Leave the technology behind and come join us for a week of exploring the outdoors, playing group games outside like Ga Ga Ball, Capture the flag, Kickball, Tag, and Scavenger Hunts. We will take a walking trip to Zippel Park, weather permitting. We will also make some cool and delicious treats. By signing up for this class, you give the teacher permission to take the students off campus during summer school time.  | Davis/ DeBauch          |            |            |          |            |            | X          |      |
| 1-8                                    | Swimming Lessons                  | Students may sign up to take swimming lessons through the Shawano High School (swimming levels 1-6). This is a 2-week course that runs Monday-Thursday each week. The students will be bussed to Shawano following lunch and will return back to the Gillett Secondary School at approximately 3:30 pm. Students who are not taking a morning summer school class during the weeks that swimming lessons are offered will need to have their own transportation to school. Transportation home will need to be provided by parents every day. | Davis                   | X          | X          |          |            |            |            | \$32 |
| 1-6                                    | Backyard Sports                   | We will play classic indoor and outdoor games and will conclude with a water day.   | Slatky/ Woosman/ Brooks |            |            |          | X          | X          |            |      |

| 1-4                                    | Board Games Galore        | This exciting and fun course consists of games and activities to challenge a student's ability to demonstrate creative thinking and strategy. The class will focus on teaching and helping children develop appropriate social skills to navigate the social world. It introduces students to new games while having fun with their favorites as well. Students will also learn skills in regulating their emotions and behavior. Students work individually, in pairs, and in small groups. A few examples of games that will be explored include: Phase 10, Risk, Othello, Dominoes, Cribbage, and more! | Princl          |            |            |          | X          |            |            |     |
| 1-6                                    | Children Around the World | Grab your passport! You are about to embark on a great journey-the ultimate field trip around the world. We will explore various countries across the globe. Students will learn about different cultures and their customs through reading, art projects, singing, dancing, cooking, guest speakers, music, and dramatic play. A travel log will be kept to record their experiences. Come join us for a trip of a lifetime! By signing up for this class, you give the teacher permission to take the students off campus during summer school time.   | Montie          |            |            |          |            | X          |            | \$7 |
| 2-6                                    | Crafty Kids and Books     | Crafty Kids and Books is a class for those who like to read and listen to books, cut, color, paint, draw, bead, and basically let their imaginations run wild! Each day, students will be visiting academic stations to create wonderful works of art!   | Montie          | X          |            |          |            |            |            | \$5 |

| 2-6                                    | Basketball 101              | Come one come all ....so we can play basketball! Boys and girls, summer is the time you should be developing your skills and reinforcing your muscle memory. This class will teach you the methods to improve your game, from the basics to the advanced. You will be given the opportunity to become more self confident as a student athlete on and off the court. A part of each day will be set aside so we can have fun playing games and have contests that will use your developing skills in a relaxed, enjoyable setting. | VanAllen        | X          |            |          |            |            | X          |     |
| 2-7                                    | Fun with Legos              | Join Mrs. Davis for a week of Lego Fun. We will do mini challenges every day like making a catapult, pulley, zipline as well as free play with legos and kit building. Everything will be awesome.   | Davis           |            | X          | X        |            |            |            |     |
| 2-5                                    | Movies, Popcorn and Friends | Friendship, honesty, bullying, and acceptance will be discussed in this totally unique summer school class. Each week the students will discuss issues facing them during a typical school day. The students will create projects and perform reader's theater skits to reinforce the message. At the end of each week, the students will watch a movie that will bring our discussions to life.   | Princl          |            | X          |          |            |            |            |     |

| 2-6                                    | The Wild West                   | Do you like to have a “Rootin Tootin” good time? In Wild West, we will study topics like cowboys, horses, Native Americans, and pioneers through stories, songs, games, and art. The “Sheriff” will read aloud many legends and tall tales about the American West. Along the way, the Sheriff’s deputies will create exciting and fun art projects, cook and sample Wild West foods, sing campfire songs, play pioneer games, and have loads of fun. Cost: \$10.00 for food and supplies   | Montie          |            |            |          |            |            | X          | \$7 |
| 3-6 and 9-12                           | PBIS Cool Tool Video Production | PBIS Cool Tool Video Production Do you love acting? Do you want to learn how to make movies? Do you want to learn how to use the green screen? This class...is THE CLASS for you! In this class, you will be creating videos where you demonstrate all of our PBIS Skills of the Week. You get to help write the scripts, film the scenes, and be the actors and actresses. Then, you learn how to take the videos and edit them, add music and graphics, and create a finished project that will be shown each week to every class in the elementary school! We will be using iPads and the iMovie app. You don’t need to know how to use this app or how to film videos to take this class, but you sure will by the time you are done! This is a class that you can take more than one week, because there are always new skills and videos to create. Don’t wait...sign up today, and be the STAR of the Gillett Elementary Cool Tool Videos! | Stuart/ Yeager  | X          | X          | X        |            |            |            |     |

| Grade Level (s) Students Enter in Fall | Course Name                     | Course Description  | Primary Teacher | June 15-18 | June 22-25 | July 6-9 | July 13-16 | July 20-23 | July 27-29 | Fee |

| 3-5                                    | Acting Up at Gillett Elementary | The students will be acting it up by performing a play! We will have rehearsals, make props, and perform the play for other students and family members!!   | Slatky          |            |            | X        |            |            |            |     |
| 3-8                                    | Games Galore                    | Board games are one way to learn and improve social skills. They help students learn the concept of rules and how to follow them while practicing manners. Games teach critical thinking, encourage skills in verbal communication, sharing, taking turns and waiting. They can build stamina in attention span and focus. Learning new games can lead to more valuable family time. Challenge your friends to games of UNO Sequence, Connect Four, Checkers, Spoons, War memory, Yahtzee, Scrabble, Chinese Checkers, Boggle, Crosswords, Sudoku, Othello, Sequence, Mancala and more.   | Davis/Brooks    | X          |            | X        |            |            |            |     |
| 3-6                                    | Empowering Kids                 | Are you interested in helping our your community? Service projects empower kids with responsibility and foster their compassion towards others. A service project can help the elderly or the homeless, the environment or our furry friends. For this mini unit we will learn about Meals on Wheels and decorate placemats to be included with meal delivery. We will learn about animal shelters and make dog biscuits to donate to a local one in need. Additionally, we will discuss what it means to be a veteran and write thank you letters to our local heroes. We will also create care packages for children's hospital in need. Please join us and become empowered! | Princl          | X          |            |          |            |            |            |     |

| 3-6                                    | Let's Create!           | Students will design, create and title four mixed-media art canvases using a variety of art materials and art processes. Students will create an "artist's journal"; including artists notes, design plans and photos of their art pieces. On the last day of class, the students will put on an art show to share their artworks with others.   | Tracy           |            |            |          | X          |            |            |     |
| 4-8                                    | Edible Pinterest Crafts | Are you crafty? Looking for some fun and sometimes tasty crafts to create? Look no further. This course will offer fun crafts based around the wonderful world of food found on Pinterest.   | Knuteson        |            |            |          |            | X          |            | \$6 |
| 5-12                                   | Learn to Crochet        | Students will be introduced and become familiar with basic crochet tools and techniques, like single crochet and double crochet. We will be making a simple scarf project for students to gain confidence in their crochet abilities. There will be movies or music too while we crochet! This is a great way to relax during your summer and learn a great stress management skill. We will be taking a walking field trip to the local craft store. By signing up for this class, you give the teacher permission to take your child off campus to participate in the programs being offered during the class. | Miklaszewicz    | X          |            |          |            |            |            | \$5 |
| 5-12                                   | Crafty Corner           | Students will be introduced to a number of different crafts they can do with friends or give as gifts of friendship. Friendship bracelet making, melt beads, Sharpie projects, night light mason jars, and several other small projects. Students will work on a different craft each day and take home what they make along with new found craft skills! Fee of \$5 is to help cover the cost of supplies so students can take home more projects!  | Miklaszewicz    |            | X          |          |            |            |            | \$5 |

| 5-12                                   | Wall Art         | Students will be working with several different mediums to create some of their own art to decorate with. Projects will include things like string art, canvas painting, 3D Decorative letters, and fake stained glass. Students will also be working on time management skills and project planning. Fee is to help cover the cost of supplies so students can take home more projects!  | Miklaszewicz    |            |            | X        |            |            |            | \$5  |
| 5-12                                   | Advanced Crochet | For students who have taken Learn to Crochet, or already know how to crochet, and are looking for more challenging projects. Possible projects could include circular dish scrubbies, hot pan holders, and scarves. Movies or music will be played while we crochet! This is great way to relax during your summer and learn a great stress management skill. We will be taking a walking field trip to the local craft store. By signing up for this class, you give the teacher permission to take your child off campus to participate in the programs being offered during the class. | Miklaszewicz    |            |            |          | X          |            |            | \$5  |
| 5-12                                   | Scrapbooking     | This class will be traditional scrapbooking with paper and embellishments. There will be something for everyone, from beginner to expert. The cost will include a scrapbook, and supplies to make pages, accents, or embellishments in the class. Start gathering pictures that you would want to put into your scrapbook and bring them with you. Please bring scissors and/or adhesives if you have them.   | Davis           |            |            |          |            | X          |            | \$15 |

| 5-10                                   | Roughin It!              | Students will be learning about fishing, catching some fish, swimming and enjoying the warm weather. Please bring your own fishing pole and lures and wear a swim suit. Live bait will be provided. By signing up for this class, you give the teacher permission to take your child off campus to participate in the programs being offered during the class. | VanAllen           |            |            |          |            | X          |            |     |
| 5-12                                   | Sewing 101               | In this class we will be working on hand sewing skills and learning the basics of a sewing machine. We will be making small felt stuffed projects, pincushions, and one last larger project. If you have your own machine please let us know when you sign up, otherwise space is limited! First come for the machines I have available.                       | Miklaszewicz       |            |            |          |            | X          |            | \$5 |
| 6-12                                   | Basketball Shooting Camp | Designed for boys and girls entering grades 6-12 looking to improve their shooting techniques. We will break down the shooting process and work on shooting free throws, shooting off the dribble, and shooting off the pass. There will be a mix of shooting drills and games. The ultimate goal is to build confidence in each shooter's ability.            | DeBauch/<br>Franti |            |            |          |            | X          |            |     |
| 5-12                                   | Card Making              | Students will be working on several different cards which they will be able to take with them. Students will be learning different techniques and design concepts. Things like color theory, card layout, stamping, and designing your own cards will be taught.   | Miklaszewicz       |            |            |          |            |            | X          | \$5 |

| 6-12  | Speed and Strength                       | This course is designed for Gillett students who want to improve their athletic performance. This performance improvement will be achieved through a variety of clinically proven exercises and training models which include plyometrics, foot quickness developers, overspeed training, weight training, and balance and agility training.   | DeBauch/<br>Beyerl     |                   | X                 | X               | X                 | X                 | X                 |            |
| 6-12  | Training For Middle and Distance Running | The goal of this class is to help you become a better runner. To accomplish this goal, we will include aspects of: warm-ups, cool downs, weight training, and increasing speed and strength by building on the mileage that you are currently capable of running. We will also include activities besides running to help increase your athletic stamina. This is not limited solely to cross-country or track athletes. All athletes are welcome to attend! | Zeitler/<br>Wagner     | X                 | X                 | X               | X                 | X                 | X                 |            |
| 7-10  | Junior Teacher                           | Do you like to help out in the classroom? Are you good at working with kids? This class is for students entering grades 7-10 who are under 16 years of age and would like to work with the teachers and help in some of the summer school classes. By signing up for this class, you give the teacher permission to take your child off campus to participate in the programs being offered during the class.  | Brown/Halla            | X                 | X                 | X               | X                 | X                 | X                 |            |
